

Photoshop – Keyboard Shortcuts

The shortcuts for Macs are the same except CTRL and ALT keys have different names:

Windows	Mac
CTRL	CMD or Command key
ALT	Opt or Options key

Keyboard Shortcut	What it does
General Commands	
CTRL Z	Undo
SHIFT CTRL Z	Redo
CTRL C	Copy whatever is selected
CTRL X	Cut whatever is selected
CTRL V	Paste what you have copied or cut
CTRL S	Save
SHIFT CTRL S	Save As
CTRL A	Select All
CTRL D	Deselect
SHIFT CTRL I	Invert
Screen Viewing Commands	
CTRL 1	Display image at full size
CTRL 0	Fit image to screen
CTRL + and CTRL -	Enlarge or reduce image display
Tool Commands	
CTRL L	Levels
CTRL U	Hue, Saturation and Luminance
SHIFT f5	Content-aware Fill
Layer Commands	
F7	Display Layers Panel
SHIFT CTRL ALT E	Merge Visible Layers
SHIFT CTRL N	Create new layer
CTRL J	Duplicate layer(s)
CTRL T	Transform layer(s)
CTRL G	Group Layers
Brush and Colour Commands	
[Decrease brush size
]	Increase brush size
D	Default foreground and background colours
X	Switch foreground and background colours

There are many other shortcuts but it can be somewhat overwhelming, so I've only included the ones I use most regularly. If you google 'Photoshop Cheat Sheets' you will get more comprehensive versions.
